BSRBR-RA Outreach/Remote Consent for <u>Re-Registrations</u>

An existing study participant may be eligible for re-registration if they commence treatment with another therapy. The 'eligibility checker' here shows which therapies are eligible for re-registration https://www.bsrbr.org/hospitals/data-collection/. A DAS28 is required from before the commencement of the new therapy.

Step One

Person taking consent posts the documents for outreach consent for re-registration to the study participant:

Document	Download from
BSRBR-RA Outreach Re-consent Covering Letter (Switchers)	Section 3 https://www.bsrbr.org/hospitals/research-development/documents/
Information Sheet	https://www.bsrbr.org/hospitals/data-collection/
Consent Form	
Transparency Sheet	
HAQ	
EQ5D	Not available on website - please contact the team for a copy.

If the participant has any questions about re-consenting, they can contact the research team on the details provided within the letter.

Step Two

Study participant signs the re-consent form and posts it back to the hospital, along with the HAQ and EQ5D.

Step Four

Study participant can be re-registered in the online database after a switch request has been made in the original Study ID. Please remember to upload the re-consent form.

Step Three

Person taking consent countersigns the re-consent form, posts a copy back to the participant and puts original form in the patient notes.

Top Tips!
1. If you don't have a DAS-28 for when the participant started therapy, use the closest pre-biologic score from the patient notes.
2. If you need stamps for postage, contact the team and we can send you some.
3. There is also an outreach consent process for registering people who are <u>new to the study</u>. Please contact us for this on the address below.
